Axelrod-Python-Tournament Documentation

Release 0.0.23

Axelrod-Python Project

January 20, 2016

Contents

This documentation contains the latest results of the full tournament from the Axelrod-Python project.

Click on each type of tournament below to see plots of the results.

Contents:

CHAPTER 1

Standard Tournaments

Contents:

1.1 Basic Strategies

1.1.1 Ranked violin plot

The mean utility of each player.

1.1.2 Payoffs

The pair wise utilities of each player.

1.1.3 Evolutionary dynamics

The evolutionary dynamic of the strategies (based on the utilities).

1.1.4 Wins

The number of wins of each player.

1.1.5 Payoff differences

The payoff differences for each player.

1.1.6 Pairwise payoff differences

The difference of payoffs between pairs of players.

1.2 All Strategies (without cheaters)

1.2.1 Ranked violin plot

The mean utility of each player.

1.2.2 Payoffs

The pair wise utilities of each player.

1.2.3 Evolutionary dynamics

The evolutionary dynamic of the strategies (based on the utilities).

1.2.4 Wins

The number of wins of each player.

1.2.5 Payoff differences

The payoff differences for each player.

1.2.6 Pairwise payoff differences

The difference of payoffs between pairs of players.

1.3 All Strategies (including cheaters)

1.3.1 Ranked violin plot

The mean utility of each player.

1.3.2 Payoffs

The pair wise utilities of each player.

1.3.3 Evolutionary dynamics

The evolutionary dynamic of the strategies (based on the utilities).

1.3.4 Wins

The number of wins of each player.

1.3.5 Payoff differences

The payoff differences for each player.

1.3.6 Pairwise payoff differences

The difference of payoffs between pairs of players.

1.4 Cheating Strategies

1.4.1 Ranked violin plot

The mean utility of each player.

1.4.2 Payoffs

The pair wise utilities of each player.

1.4.3 Evolutionary dynamics

The evolutionary dynamic of the strategies (based on the utilities).

1.4.4 Wins

The number of wins of each player.

1.4.5 Payoff differences

The payoff differences for each player.

1.4.6 Pairwise payoff differences

The difference of payoffs between pairs of players.

CHAPTER 2

Noisy Tournaments

Contents:

2.1 All Strategies (without cheaters) and 5% noise

2.1.1 Ranked violin plot

The mean utility of each player.

2.1.2 Payoffs

The pair wise utilities of each player.

2.1.3 Evolutionary dynamics

The evolutionary dynamic of the strategies (based on the utilities).

2.1.4 Wins

The number of wins of each player.

2.1.5 Payoff differences

The payoff differences for each player.

2.1.6 Pairwise payoff differences

The difference of payoffs between pairs of players.
